Qualification – MVSc/PhD.

Organization: Advanced Veterinary Care Foundation

Unit Name: Small Animal Hospital

Location: Mumbai

Employment type: Permanent/Full-Time

Reporting to: Department Head

About Us

Advanced Veterinary Care Foundation (“AVCF”), is a registered company under Section 8 of the Companies Act 2013 that was set up by Tata Trusts in 2018 to ‘build and operate’ a state-of-the-art veterinary hospital in Mahalaxmi, Mumbai. AVCF will be responsible for setting up and managing the first of its kind veterinary hospital with the aim of providing ‘approachable expertise’ in the field of veterinary care for small and companion animals. The proposed hospital will be situated at G.B.Sakpal Marg, Mahalaxmi, Mumbai, on land owned by MCGM. The hospital will have comprehensive treatment facilities including 24*7 emergency services, in-patient facilities, full diagnostic capability and will be a front runner in the field of veterinary care, AVCF aims to be the recruiter of choice amongst professional veterinarians.

Job Description

The veterinary doctor under a specific department is critical to the success of AVCF. They will be a key member of the founding team and they will be crucial to ensure our hospital becomes an efficiently functioning high quality clinical site; supporting both the setup and the final delivery. She/he work with team of clinicians, nurses and support staff to deliver a high-quality emergency and critical care service. This role will have oversight of our client facing triage services, responsible for ensuring that the appropriate cases are reaching the ICU. It will be an individual contributor role working alongside with clinicians.

- Develop and deliver that appropriate training to the nurse and vet cadre to ensure we achieve a high standard from the day of launch.
- Work within the team on seeing clients, leading rounds, and overseeing the clinical care of all patients in the hospital – ensuring that all animals have appropriate clinical plans.
- Role-modelling outstanding clinical professionalism – an ambassador for good professional behavior and compassionate leadership.
- Audit production and analysis to ensure we are leading with both our data capture and our review process. Delivering our ambition to be a data driven centre of excellence

Skills and Competencies

- Capable of making pragmatic clinical decisions where owner, animal, facilities or staff dictate.
- A team player who's self-motivated and able to deliver their core role independently.
- Deadline-driven, organized and able to multitask
- Strong verbal, written able to communicate challenges with equipment in a clear and concise fashion.
- Commitment to foundation's core values, mission and purpose.
